STHABISO SIBISI

Gauteng Vooslorus | (+27) 688284599 | sibisisthabiso85@gmail.com

PROFILE

I am a dedicated and motivated Information Technology graduate with an N Diploma in Software Development. I have a strong interest in systems development, enterprise application integration, database management, and software solutions. Through my academic studies and practical experience, I have developed skills in programming, system analysis, troubleshooting, database design, and application support.

Currently I work at JumpCO as a Systems Developer(Intern role).
I have hands-on experience working with IBM App Connect Enterprise (ACE), IBM MQ, ESQL, REST APIs, SOAP Web Services, PostgreSQL, Springboot, MySQL database and Apache Kafka event stream to develop and support integration solutions. My experience includes creating and maintaining message flows, transforming JSON and XML data, debugging system issues, and integrating applications across different platforms.
I possess strong analytical, problem-solving, and communication skills and am eager to contribute to innovative technology projects while continuously expanding my technical expertise in systems development, software engineering, and enterprise integration.

EDUCATION

N diploma in Information of Technology
Vaal University of Technology | **November 2025**

Cisco Networking Academy – Introduction to Networking (CCNA2)
Vaal University of Technology | **February 2022**

PC Hardware and Software Certificate
Vaal University of Technology | **November 2023**

National Senior Certificate (Matric)
Mzilikazi Secondary School| **December 2021**

SKILLS

- Programming Languages: Java, Python, ESQL, SQL
- Enterprise Integration: IBM App Connect Enterprise (ACE), IBM MQ, Message Flows, Message Queues
- API Development & Integration: REST APIs, SOAP Web Services, JSON, XML
- Database Management: PostgreSQL, MySQL, SQL Server, Oracle Database, MangoDB
- Web Development: HTML, CSS, JavaScript, React
- Event Streaming & Messaging: Apache Kafka, Publish/Subscribe Messaging
- System Development: Application Development, System Analysis, Software Testing, Debugging
- Troubleshooting & Application Support: Incident Analysis, Problem Resolution, Log Analysis

• Networking: IP Addressing, Subnetting, Router & Switch Configuration (Cisco Packet Tracer)
• Version Control & Development Tools: Git, GitHub, Visual Studio Code, Eclipse
• Cloud Computing Fundamentals: Microsoft Azure
• Soft Skills: Problem Solving, Analytical Thinking, Communication, Team Collaboration, Time Management

WORK EXPERIENCE

Systems Developer Intern

JumpCO **| January 2026 – Present**

• Develop and maintain enterprise integration solutions using IBM App Connect Enterprise (ACE) and IBM MQ.
• Create and enhance message flows, message transformations, and routing logic using ESQL.
• Integrate applications and services through REST APIs and SOAP Web Services.
• Perform JSON and XML message transformation, validation, and processing.
• Develop and execute database operations using PostgreSQL and SQL.
• Troubleshoot and resolve application, integration, and messaging issues across multiple environments.
• Support testing, deployment, and monitoring of integration solutions.
• Participate in system analysis, requirements gathering, and technical documentation.
• Assist in implementing event-driven solutions using Apache Kafka.
• Collaborate with developers, business analysts, and support teams to deliver reliable business solutions.

IT support (Practical Training)
Vaal University of Technology | **February 2022 – November 2023**

- Assisted with troubleshooting hardware and software issues on desktops and laptops.
- Installed and configured operating systems and application software.
- Supported networking activities, including IP configuration and connectivity testing.
- Helped maintain documentation of IT equipment and user support requests.

Academic IT Projects **August 2025**

- Designed and implemented a student management system using Java and MySQL.
- Developed a responsive website showcasing services using HTML, CSS, JavaScript and PHP.
- Configured a network topology in Cisco Packet Tracer, including IP addressing, subnetting, and router/switch setup.
